

Take control of your HP printer and MFP inventory, volumes and costs, with our cost per print program.

Managed Print Services

Are your printers and their high supply costs stealing from your organization's bottom line?

Do you have a print strategy? Most organizations don't and they have little information as to what their printers are costing them, how many they have, and where they are all located. UBM takes an innovative IT centric approach to locating your printers, managing them, and taking control of their costs. We will bring savings to your organization while improving reliability and maximizing quality.

We will:

- Assess your current print environment
- Report on the current volume usage
- Provide recommendations to maximize usage of your current inventory
- Collect meter reads monthly
- Deliver accurate reports and invoices

Questions You Should Have Answers To:

- How many printers do we have?
- Where are they located?
- What are the brands and models?
- What are their monthly print volumes?
- How much toner do we go through?
- What am I spending on toner and service?
- What is my page coverage?
- What is my true cost per print?

“Printing expenses are the third highest expense after payroll and rent.”

“Many businesses underestimate their printing needs and expenses by as much as 50 percent.”

“Users of enterprise-level assessments have reported up to 40% lower output costs; not only from a hardware acquisition perspective, but also from the cost associated with running the equipment.”
